Develop the necessery skills to transition to an engineering lead role.

PERSONAL COMMENT

I try my best to behave in a professional manner and operate with no ego. I am always open to take advice, guidance or criticism from anyone. While always being available to offer help to others myself. I do not discriminate against anyone, in any shape or form.

I am a self motivated person, that is always up for the challenge of learning new, interesting and efficient technologies. I thoroughly enjoy my job and I spend a good portion of my free time studying to improve.
