 - Red Hat Enterprise Linux - Ansible
 - Certified Kubernetes Application Developer

Longterm:

- Transition to product management role.
-

Personal Comment:

I try my best to behave in a professional manner, leaving all egos aside. I am always open to take advice/guidelines/criticism from anyone. While always being available to offer help, to anyone around me. I do not discriminate against any of my colleagues in any shape or form.

I am always up for the challenge of learning new, interesting and efficient technologies. I thoroughly enjoy my job and consider the time spent learning as no burden, but a hobby.
