EDUCATION

University of Aegean, Information and Communication Systems Department

Pending Thesis to complete the Master's Degree.

FURTHER TECHNOLOGIES

As a developer I am fairly active and interested in things outside my day to day work. I constantly benchmark things, write articles, build PoC's and try out new technologies. I will list some of them here because many of them are things that I would be more than happy to work with, or improve my level on.

SolidJs, Qwik, Astro, StrapiCMS, Express, SQL, Tailwind, System Administration, Go, Echo, GoTempl, React Testing Library, Platformatic, NestJs, Vite, LitJs, WebComponents
